## 4096 (H) x 4096 (V) Full Frame CCD Image Sensor

### Description

The KAF-16803 image sensor is a redesigned version of the popular KAF-16801 image sensor (4096 (H) × 4096 (V) pixel resolution), with enhancements that specifically target the needs of high performance digital radiography applications. Improvements include enhanced quantum efficiency for improved DQE at higher spatial frequencies, lower noise for improved contrast in areas of high density, and anti-blooming protection to prevent image bleed from over exposure in regions outside the patient.

The sensor utilizes the TRUESENSE Transparent Gate Electrode to improve sensitivity compared to the use of a standard front side illuminated polysilicon electrode, as well as microlenses to maximize light sensitivity. When combined with large imaging area and small pixel size, the KAF-16803 provides the sensitivity, resolution and contrast necessary for high quality digital radiographs.

To simplify device integration, the KAF-16803 image sensor uses the same pin-out and package as the KAF-16801 image sensor.

Table 1. GENERAL SPECIFICATIONS

Parameter	Typical Value
Architecture	Full Frame CCD, Square Pixels
Total Number of Pixels	4145 (H) × 4128 (V) = 17.1 Mp
Number of Effective Pixels	4127 (H) × 4128 (V) = 17.0 Mp
Number of Active Pixels	4096 (H) × 4096 (V) = 16.8 Mp
Pixel Size	9.0 μm (H) × 9.0 μm (V)
Active Image Size	36.8 mm (H) × 36.8 mm (V) 52.1 mm Diagonal 645 1.3x Optical Format
Aspect Ratio	1:1
Horizontal Outputs	1
Saturation Signal	100,000 electrons
Output Sensitivity	22 μV/e <sup>-</sup>
Quantum Efficiency (550 nm)	60%
Responsivity (550 nm)	28.7 V/μJ/cm <sup>2</sup>
Read Noise (f = 4 MHz)	9 e <sup>-</sup>
Dark Signal	3 e <sup>-</sup> /pix/sec
Dark Current Doubling Temperature	6.3°C
Linear Dynamic Range (f = 4 MHz)	80 dB
Blooming Protection (4 ms Exposure Time)	> 100 X Saturation Exposure
Maximum Date Rate	10 MHz
Package	CERDIP (Sidebraced, CuW)
Cover Glass	AR Coated, 2 Sides and Taped Clear

NOTE: Parameters above are specified at T = 25°C unless otherwise noted.

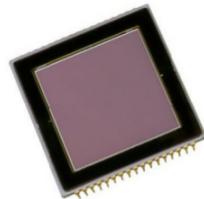

Figure 1. KAF-16803 CCD Image Sensor

### Features

- TRUESENSE Transparent Gate Electrode for High Sensitivity
- High Resolution
- Large Image Area
- High Quantum Efficiency
- Low Noise Architecture
- Board Dynamic Range

### Application

- Medical
- Scientific

**Camera CCD Moravian G4-16000**

Marca: Moravian  
Codice: MV-G4-16000  
Condizione: Nuovo

Camera CCD Moravian G4-16000 monocromatica con sensore CCD KAF-16803 da 16 Mpx (4096 x 4096). Un sensore gigante assoluto protagonista in astrofotografia a grande campo e con ottime doti anche per ricerca scientifica!

**6 949,00 €**
